These early day rangers will recall when they started out on the uncharted job of protecting a vast forest area, pretty much on their own...the long periods of isolation, the long hard rides over rough country, some of them on horses borrowed from Col. William Cody, better known as Buffalo Bill. The Shoshone National Forest was established by proclamation of the President Harrison in 1891. The first wagon road through it was opened in 1905; the first auto road in 1916. Today the 12 million acre Shoshone Forest contains over two billion feet of timber, protects the watersheds of two large irrigation projects, provides summer range for 85,000 head of cattle and sheep, and its magnificent scenery attracts thousan of vacationists. The Forest is noted for its big game. So, a salute to the Shoshone National Forest, "daddy" of all the 160 National forests, and to the town of Cody, Wyoming. 1ts headquarters. Here's hoping the first fifty years are the hardest, and that the Shoshone will go on forever, serving as the Forest Service motto says "the greatest good of the greatest number of people in the long run."
